Location : Ghaziabad, India

Strengths

- Problem solving ability
 - Fast learner, and loves the learning process
-

Skills

- .NET Core
- Rest APIs
- Unit Testing
- Git
- SQL
- React
- Typescript
- Node.js
- Docker

Education

SHARDA UNIVERSITY, GREATER NOIDA

BSc. Computer Science

2018-2021

CGPA : 7.8

INSTITUTE OF TECHNOLOGY AND SCIENCE, MOHAN NAGAR (affiliated by AKTU)

Masters of Computer Application

2022-2024

CGPA : 7.95

Experience

SOFTWARE DEVELOPMENT ENGINEER - REMOTESTATE SERVICES.

Dec 2023 – Mar 2025

Developed robust APIs using .NET core and C# language, worked with tools like Amazon S3, MSSql, MySQLServer, Postman, Entity Framework Core, Redis, Swagger, Hangfire, RabbitMQ, Docker and so on and successfully delivered projects.

During this time I worked on two projects :

1. **Education Planner** : Education planner is a counselling website for students who want to study abroad.

Edit with WPS Office

Hobbies

- Playing Chess
- Coding
- Badminton

My Role : As a backend developer I made rest APIs in C#, worked on MySQLServer to create, alter tables and query data from, documenting APIs using swagger and testing them using Postman.

2. Prudential : Worked on different sub projects within this project as this project is made in microservices architecture. I learned about microservices architecture and how different services communicate with each other. Created robust APIs, tested them using tools like Postman.

Besides these, I also have knowledge in frontend technologies like React, Typescript, TailwindCSS and React Query .
